

# Week Report 0

## Summary of Presentation: Introduction to CIS 106

Write your summary here

Markdown and github

Easy way to use and import any content to work with the program and github itself

other thing I like about markdown and all the project we submit to git hub is the versatile of the use it has like no could imagine that this software is so easy to use.

## My github account

The screenshot shows a GitHub repository page for 'mmcollado / cis106'. The repository is public and has 0 stars, 1 watching, and 0 forks. The repository contains a list of files, all of which were added 17 hours ago. The files are: budgie.png, core.png, desktop.png, kubuntu.png, kylin.png, lubuntu.png, mate.png, studio.png, and ubuntu.png. The repository also has a 'Releases' section with no releases published and a 'Packages' section with no packages published. The repository is described as 'Spring 2022 semester linux introduction'. The repository is also linked to a 'Languages' section showing 100.0% HTML. The repository is also linked to a 'Help' section with a button to 'Add a README'.

File Name	Added
